

COCO

Formal rigour, seductive charm

The art of reinventing the rules of fashion to create a style beyond time, the synthesis of formal rigour and sophisticated elegance. Coco, a decorative water finish, makes the rules of interior design and outlines the boundaries of style with impeccable, innovative and versatile aesthetic solutions, which give character and personality to any environment.

TECHNICAL DETAILS

COCO Decorative colour System consists of:

- FINE FASHION PRIMER – Acrylic water primer for interiors
- COCO DIAMOND – Acrylic water finish with fine pearlescent effects
- COCO PEARL – Acrylic water finish with changing bright reflections.
- COCO Ready colours.

PREPARATION OF THE SURFACES AND OF THE COLOURS

• Suitable surfaces

All the plaster, gesso, stucco primers and all the flat and smooth surfaces are suitable.

• Preparation of the surfaces

After a thorough cleaning and plastering of the surfaces, apply a coat of FASHION FIX diluted 1:3 with water by a brush. If the surfaces are particularly chalked it is advisable to apply first a coat of FASHION FIX diluted 1:6 with water. Apply the diluted product with brush, in a single coat, until complete impregnation of the surface.

• Application of FINE FASHION PRIMER

After having adequately prepared the surfaces, apply FINE FASHION PRIMER in one or two coats with a short hair roller (item 490.20); in case of particularly absorbent walls, apply first a coat of FINE FASHION PRIMER diluted to 30-40% with water.

• Application of COCO DIAMOND – COCO PEARL

COCO shall be applied in a single coat after dilution to 5% with potable water. After having accurately prepared the surface as indicated in the data sheet, apply the product following one of the recommended techniques. The product is easy to apply and its spreading and application do not create problems of junctions on the walls.

• PREPARATION OF COLOURS

In order to obtain the colours of the catalogue, simply add to COCO the 250 ml - 50 ml FASHION COLOUR and mix manually.

Different doses from those mentioned create different tints from those showed in the catalogue.

LINEN EFFECT

Dip the appropriate glazing brush (item 955.7 - 955.10) into COCO and apply a small quantity of product with cross and irregular brush strokes on the surface prepared with FINE FASHION PRIMER, avoiding clear squaring; carry on with the decoration until the brush gets unloaded, so as to have no neat overlaps of colour. In order to obtain a more nuanced effect and make the distribution of the product more homogeneous, go over the treated surface once again using an unloaded brush. The amount of material used, the size, shape and intensity of brush strokes determine the tailored decorative effect.

Theoretical yield: 10 - 12 square meters/litre.

PACKAGES

FINE FASHION PRIMER: 5 and 15 Litres

COCO: 1 and 5 Litres

INSTRUCTIONS

- Should the preparation of more packages of the same colour be required please use products and colours of the same production lot.
- In order to reproduce perfectly the effects presented in the catalogue and make the decoration easy , please use the suggested tools.
- Do not apply the product with temperatures of the environment and /or the support below +5 ° C and above +35 ° C and/or with relative humidity of the environment > 85% and of the support >10%
- Keep the product in its original container, well sealed and at temperatures between +5 ° C and +40 ° C, sheltered from sun and frost.

The colours in the catalogue have a merely indicative value.
